# Project Design Phase-II Technology Stack (Architecture & Stack)

| Date         | 22 May 2023  |
|--------------|--|
| Team ID      | PBL-NT-GP-10533-1682762877                         |
| Project Name | Competitive analysis of leading travel aggregators |

#### **Technical Architecture:**

The Deliverable shall include the architectural diagram as below and the information as per the table 1 & table 2

**Example: Order processing during pandemics for offline mode** 

Reference: <a href="https://developer.ibm.com/patterns/ai-powered-backend-system-for-order-processing-during-pandemics/">https://developer.ibm.com/patterns/ai-powered-backend-system-for-order-processing-during-pandemics/</a>

#### Guidelines:

Include all the processes (As an application logic / Technology Block)

Provide infrastructural demarcation (Local / Cloud) Indicate external interfaces (third party API's etc.) Indicate Data Storage components / services Indicate interface to machine learning models (if applicable)

| 5.No | Component           | Description                              |                                      |
|------|---------------------|--|--------------------------------------|
| 1.   | User Interface      | How user interacts with application e.g. | HTML, CSS, JavaScript / Angular Js / |
|      |                     | Web UI, Mobile App, Chatbot etc.         | React Js etc.                        |
| 2.   | Application Logic-1 | Logic for a process in the application   | Java / Python                        |

| 3.  | Application Logic-2             | Logic for a process in the application   | IBM Watson STT service  |
|-----|---------------------------------|--|---|
| 4.  | Application Logic-3             | Logic for a process in the application   | IBM Watson Assistant  |
| 5.  | Database                        | Data Type, Configurations etc.   | MySQL, NoSQL, etc.  |
| 6.  | Cloud Database                  | Database Service on Cloud  | IBM DB2, IBM Cloudant etc.  |
| 7.  | File Storage                    | File storage requirements  | IBM Block Storage or Other Storage<br>Service or Local Filesystem |
| 8.  | External API-1                  | Purpose of External API used in the application  | IBM Weather API, etc.   |
| 9.  | External API-2                  | Purpose of External API used in the application  | Aadhar API, etc.  |
| 10. | Machine Learning Model          | Purpose of Machine Learning Model  | Object Recognition Model, etc.                                    |
| 11. | Infrastructure (Server / Cloud) | Application Deployment on Local System / Cloud<br>Local Server Configuration:<br>Cloud Server Configuration: | Local, Cloud Foundry, Kubernetes, etc.                            |

## **Table-2: Application Characteristics:**

| S.No | Characteristics          | Description   | Technology                           |
|------|--------------------------|---|--------------------------------------|
| 1.   | Open-Source Frameworks   | List the open-source frameworks used  | Technology of Opensource framework   |
| 2.   | Security Implementations | List all the security / access controls implemented,  | e.g. SHA-256, Encryptions, IAM       |
| 3.   | Scalable Architecture    | use of firewalls etc.  Justify the scalability of architecture (3 – tier,   | Controls, OWASP etc. Technology used |
| 4.   | Availability             | Micro-services)  Justify the availability of application (e.g. use of load balancers, distributed servers etc.)           | Technology used                      |
| 5.   | Performance              | Design consideration for the performance of the application (number of requests per sec, use of Cache, use of CDN's) etc. | Technology used                      |
